

*Helping You In Regaining Your Independence!*

## Who We Are:

Crown Health Care Services, Inc. is a licensed Private Home Care and Assisted Living Provider through the State of Georgia's Office of Regulatory Services, Department of Community Health.

## Our Clients:

We serve individuals who are home bound and are not in need of institutional care. Our services are most useful for families who have loved ones that have been recently discharged from hospitals or have physical disabilities. Our clients need extra attention to ensure full recovery at the pace that has been recommended by their physician. We also provide assisted living services to the individuals who cannot take care of themselves in their own homes but do not want to be institutionalized in nursing homes.

*"You can count on us to be there for you"*
